

FGDC Facilities Working Group specifically focuses on geospatial data issues related to facilities and facility management. A facility is an entity with location, deliberately established as a site for designated activities. A facility database might describe a factory, a military base, a college, a hospital, a power plant, a fishery, a national park, an office building, a space command center, or a prison. The database for a complex facility may describe multiple functions or missions, multiple buildings, or even a county, town, or city. The objectives of the Working Group are to: promote standards of accuracy and currentness in facilities data that are financed in whole or in part by Federal funds; exchange information on technological improvements for collecting facilities data; encourage the Federal and non-Federal communities to identify and adopt standards and specifications for facilities data; and promote the sharing of facilities data among Federal and non-Federal organizations.

Copies of the draft GMP/EIS are also being sent to approximately 500 individuals, organizations, and libraries on a mailing list which was developed during scoping for the general management plan.

SUPPLEMENTARY INFORMATION: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Public Law 91-190, as amended), the National Park Service, Department of the Interior, has prepared a draft environmental impact statement (DEIS) that describes and analyzes the environmental consequences of a proposed action and two alternatives for the management, use, and development of Hagerman Fossil Beds National Monument. The proposed action (alternative 2), along with statements contained in the document of the purpose and significance of the monument, management objectives, desired future conditions, management zoning, and interpretive themes constitutes the draft general management plan.

The proposed action would comprehensively meet the monument's legislative mandate to provide a center for paleontological research and education, including construction of a fully functional research center and museum. The National Park Service would perform professional research,

educational, and resource management functions as peers and partners with various persons, institutions and organizations. The no-action alternative would continue the present course of action for the monument, which would not meet the legislative mandate as it would provide only minimal research and education capabilities and no research center or museum. The minimum requirements alternative (alternative 1) would minimally meet the legislative mandate with most research and education functions completely dependent on sources from outside the National Park Service, and a research center and museum constructed and operated at a limited and superficial level.

Major resource impact topics that are analyzed for the proposed action and alternatives include natural and cultural resources, National Park Service programs, socioeconomic, facilities and infrastructure, access, and visitor experience.

The official responsible for a decision on the proposed action is the Field Director, Pacific West Area, National Park Service.

Dated: November 3, 1995.

William C. Walters,
*Deputy Field Director, Pacific West Area,
National Park Service.*

SUPPLEMENTARY INFORMATION: Under the authority of 2 U.S.C. 136, the Librarian of Congress is authorized to make rules and regulations for the government of the Library and for the protection of its property.

Notice Pursuant to Final Rules on Reading Rooms and Service to the Collections—Item Inspection Pilot Program

Notice is hereby given that, on November 27, 1995, in order to further secure the Library's collections, the Library of Congress will institute an Item Inspection Pilot Program. The Library will examine and record the condition of items from its high-risk collections before and after they are used by members of the public in the Library's reading rooms. The reader may be required to surrender his/her Library-issued User Card while using a particular high-risk item. The Library Police shall investigate instances when Library staff believe that the item may have been intentionally damaged by a reader. The Library will retain the records of the condition inspections in a file for security purposes.

The objective of this pilot program is to ensure that the Library's high-risk
